Careers Learning Plan 2021-22

Information for parents

Careers Learning is about developing the skills needed for adult life for all young people, widening experiences and learning from different people it is not just about the world of work!

What is Careers Learning at Curnow School?

- ⇒ It is about enhancing their curriculum and learning through engaging and interesting activities related to the world of work. We have 3 Pathways:
 1. All students will **experience** the world of work to develop social skills, learn in different ways and from different people
 2. Some students will start to develop the **skills** necessary to access the world of work in the future
 3. A few students will be **ready** to access the world of work through relevant work experience
- ⇒ It is about how we can support the development of every student
- ⇒ It is about providing the students and families with information, advice and guidance about their future

How is it delivered?

- ⇒ There are a series of events as outlined on the next page which will provide experiences, activities, meetings and workshops for all students. These will be planned with class teachers to ensure relevance, enjoyment and engagement for all
- ⇒ Some events will be open to parents to share important information about their child's future and different options that may be available

We want to work within and with our local community to raise the profile of our school but most importantly the young people within it.

CEIAG
